DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities:

- In line 2, after "circuit board", insert --,--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 3, applicant should clarify the structure/arrangement of the "free-play zone" of the housing's wall.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3, as best understood in view of the rejection under 35 USC 112 second paragraph, are rejected under 35 U.S.C. 103(a) as being unpatentable over Wohlhieter [US 2,929,132] in view of Barankin et al. [US 4,700,167].

Wohlhieter discloses a bobbin [figures 1-2] comprising:

Art Unit: 2832

- a housing having a floor [16];
- at least one electrical lead-in [14] projecting through an aperture in the floor, wherein the at least one electrical lead-in having a given diameter; and
 - a thermal strain relief [17], wherein the thermal strain relief comprises a loop.

Wohlhieter discloses the instant claimed invention except for the aperture having a diameter larger than the diameter of the electrical lead-in.

Barankin et al. discloses a bobbin construction with strain relief having at least one electrical lead-in [26, 26A] projecting through an aperture [36, 38] of the bobbin, wherein the aperture having diameter larger than that of the at least one electrical lead-in [figures 1-2].

It would have been obvious to one having ordinary skilled in the art at the time the invention was made to use the lead-in(s) and aperture(s) design of Barankin in Wohlhieter for the purpose easily insert the lead-in through the floor/flange of the bobbin.

Regarding claim 3, Wohlhieter inherently disclose the bobbin having wall adjacent to the strain relief including a "free-play zone" [figure 4] therein into which the loop extends.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Weiner [US 6,559,749]; Thompson, Jr. et al. [US 6,369,682]; Weiner [US 5,694,105]; Stokes et al. [US 5,315,280]; Freimuth et al. [US 4,853,667]; Nabstedt et al. [US 4,636,763] and Abrams [US 3,928,829].
